

PERFECT8 TECHNOLOGIES INTRODUCES THE POINT MKII ULTRA HIGH-END GLASS LOUDSPEAKER TO THE US MARKET

LAS VEGAS (CES, The Venetian, Suite 30-322) Four time CES Best Sound Award winning Swedish high-end audio manufacturer PERFECT8 Technologies introduces the new ultra high-end glass loudspeaker **THE POINT MKII** to the US market at the 2012 International CES®. The world's largest consumer technology tradeshow, the 2012 International CES, will run January 10-13, with 2,500 exhibitors and more than 120,000 attendees from more than 130 countries.

MAKE SURE TO VISIT OUR SUITE 30-322 TO EXPERIENCE THE ENTIRELY NEW THE POINT MKII!

After the introduction of the original **THE POINT**, it has quickly become the most popular loudspeaker in our line-up. It has now received a major update. During the past year, PERFECT8 Technologies has been able to achieve something that was believed to be almost impossible: To raise the already immaculate performance of the original **THE POINT** to even higher levels - a mission demanding meticulous devotion to every design detail.

New with **THE POINT MKII**, the subwoofer enclosure has been shrunk into a smaller package without any sacrifice in low frequency response. The new 10" drivers were chosen to perfectly match the performance of the dipole panel with deep extended, super tight and ultra controlled bass reproduction, featuring record low mechanical losses, significantly decreased distortion, increased excursion and ultra-stiff aluminium cones each driven by an oversized 10 kg magnet. The drivers are matched by the absolute pinnacle of DSP controlled amplifier technology at 92% efficiency, which is now miraculously integrated into the glass subwoofer enclosure.

The new design of **THE POINT MKII** have not just improved upon the musical performance aspect but have also led to a 9% reduction of the weight, thus saving on transport carbon emissions. Our complete line-up of loudspeakers are extremely environmentally friendly.

Our Super Silent Glass contains no toxic ingredients and does not emit any chemical particles or vapors, which make them simply a better choice particularly for allergic and sensitive people! Also, in the manufacturing of the glass enclosures, no varnishes, paints and solvent based glues are being used, only materials that will last for centuries and that are easy to recycle.

"2012 will mark another milestone in our quest for the ultimate sound.

*We are extremely happy to launch the all new **THE POINT MKII** system at CES 2012! Through our groundbreaking and innovative technology we are able to create a sound of unmatched quality and striking beauty like nothing you have ever experienced before."*

Jonas Rantilä, CEO, PERFECT8 Technologies

PERFECT8 Technologies is a Swedish provider for high-end ribbon and dynamic loudspeakers and subwoofers. Backed by over 25 years of research and more than 5 years of dedicated development, PERFECT8 Technologies was founded in 2005 with the primary mission of producing the most exclusive and best sounding loudspeaker systems in the world!

Pricing for **THE POINT MKII** system with 2 front speakers and 2 outbound subwoofers is USD \$115000 (excluding local taxes). PERFECT8 has received "Best sound in show" at CES for 4 consecutive years with **THE FORCE**.
