

*Music Sculptures of Glass and Gold*

PERFECT8 Technologies

## THE POINT

"The best and most beautiful things in the world cannot be seen or even touched - they must be felt with the heart."

HELLEN KELLER

## TO INSPIRE IS OUR MISSION

PERFECT8 Technologies are dedicated to producing ultra exclusive design loudspeakers for the real connoisseur. Every detail of a PERFECT8 loudspeaker serves one ultimate purpose - perfect musical reproduction. Fill your senses with the purity of the music exactly the way it sounded at the time of recording.

## PERFECTION BY DESIGN

There is a passion behind every PERFECT8 product! Timeless design, superior craftsmanship, and outstanding sound quality - all unsurpassed milestones of excellence.

## THE POINT

Imagine a dream come true that the perfect sound could be reproduced accurately and in your living room, fully reviving grand musical moments of history. From the tiniest wisper to the greatness of a grand piano virtuoso performance all portrayed with stunning precision, as if emanating from a strange device teleported straight out of a science fiction novel. THE POINT is tantalizing and mystical, small and shy yet bold, sublime though outspoken, disappearing yet so present.

THE POINT is an amazing performer created to perfectly match and complement the exceptional qualities of THE FORCE, and the result is a deeply involving musical experience. The ultra-smooth and scratch-resistant glass surfaces enshrine the beauty creating a musical sculpture – pure and emotive. The transparency of the glass exposes every exquisite detail.

The unique challenges involved in creating the greatest sounding loudspeakers of the world, lead our research in entirely new directions, making the PERFECT8 design one of a kind. The natural beauty of THE POINT will greatly enhance any sophisticated interior and simply deserve to be the centerpiece in your favorite space.

### SPECIFICATIONS:

<b>Sensitivity (2.83V):</b>	85dB SPL @ 1m
<b>Impedance:</b>	4 ohms
<b>Frequency response: (with subwoofer)</b>	16Hz–26KHz +/- 1dB from target response.
<b>Frequency response: (stand-alone)</b>	110Hz–26KHz +/- 1dB from target response (12dB/octave L/R high pass, gradually increasing to 18dB/Octave, -6dB at 110Hz anechoic 4 pi)
<b>Frequency response: (active bass control)</b>	60Hz–26KHz +/-1dB from target response (24dB/octave L/R high pass, -6dB at 60Hz anechoic 4 pi)
<b>Typical THD:</b>	< typically 0.2% throughout midrange at 96dB SPL
<b>Radiation pattern:</b>	Monopole below 30Hz, dipole line-source above 120Hz, flexible in-between
<b>Recommended power:</b>	Long term maximum power: 200W, Short term maximum power: 500W, Maximum Impulse Power: 1000W
<b>Recommended room size:</b>	15 – 100m <sup>2</sup>
<b>Size (WxHxD):</b>	270 x 570 x 320mm
<b>Mass (approx.):</b>	30Kg / channel

**Treble:** Air motion transformer with extremely light and resonant free folded foil and powerful neodymium magnet system. Modified in-house to ensure freedom from structural vibrations.

**Midrange / Bass:** 2 (per channel) x 7" proprietary Mg-Cones with ultra linear magnetic drive. Resonances and energy storage way outside pass band.
